Straightening bench

The power of universal jig system

It is the only system in the world that allows upward jig movements and positionable crossbars for the jig itself, thanks to a rack and pinion system.

Strong and durable

Spanesi straightening bench is designed to resist the strongest pulling forces; it is made with the strongest and most durable materials to yield peak performance for many the years.

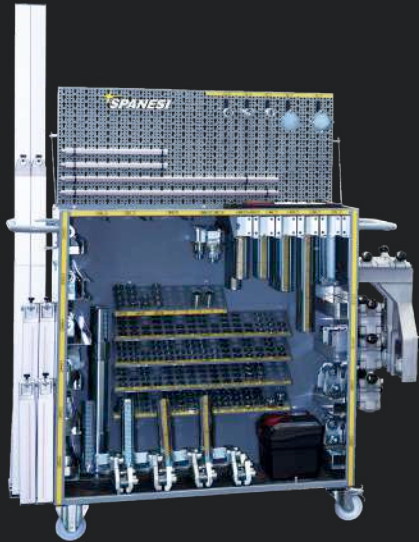

360° pulling tower

The pulling tower make straightening operations easier thanks to the positioning and the connection with automatic blocking in different points around the bench. The unit comes complete with the structural pulling kit.

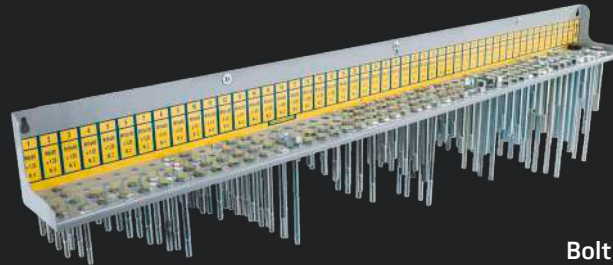

TECHNICAL DATA

Bench length	196 3/4 in.
Lifting height	61 in.
Lifting Capacity	11,000 lbs.
Electrical	208V / 1HP 30A

STANDARD ITEMS INCLUDED

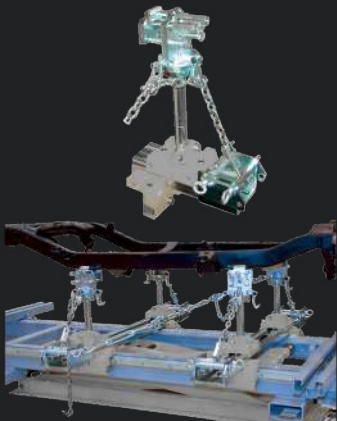

Universal Jig

Bolt rack

OPTIONS
