

TOUCH

Electronic measuring system

THE TOUCH MEASURING SYSTEM ALLOWS YOU TO QUICKLY PERFORM BODY STRUCTURAL AND MECHANICAL PARTS MEASUREMENTS, VEHICLE DAMAGE ANALYSIS, AND EFFICIENTLY CREATE ACCURATE REPAIR PLAN DOCUMENTATION.

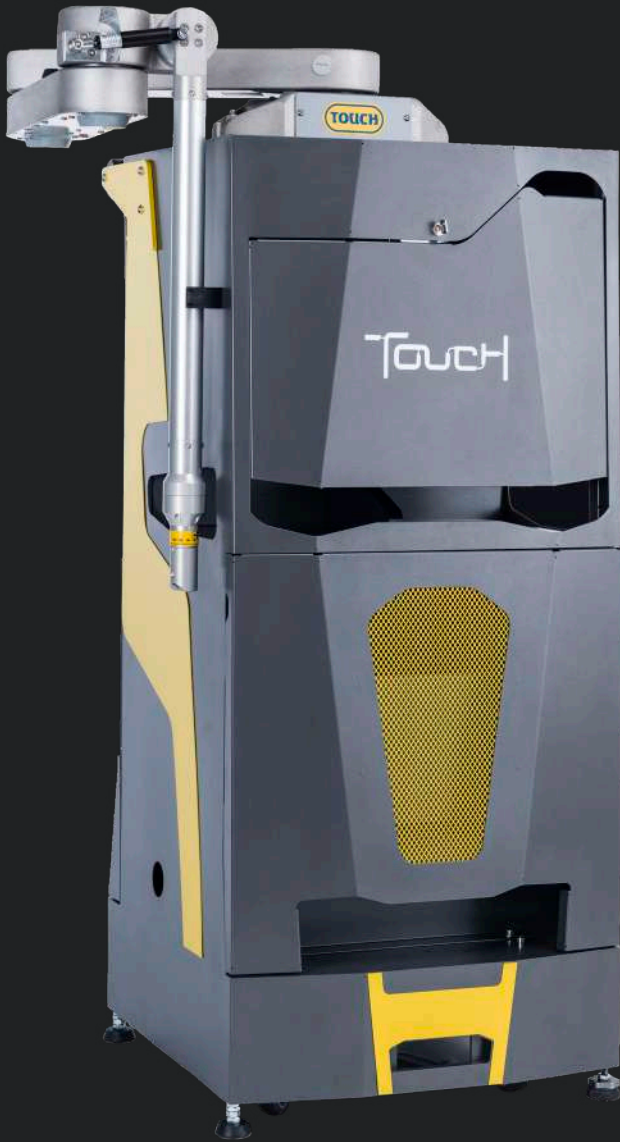

Damage analysis

- Fast and easy setup.
- Measure with any lift, bench, frame rack or with the vehicle on the ground.
- Simple and intuitive software.
- Damage analysis documentation that is simple to understand.
- Under-body, upper-body and body-side opening measurements.
- Ability to add user specified measurement points to the software database.

Vehicle repairs

- Vehicle repairs can be completed on any straightening bench.
- Measuring options include loaded and unloaded suspension measurements.
- Real-time measurements during each pull.
- Documentation for before and after repairs.

Precision, Performance, Portability.
